Nanoaq collaborates with Stamford Tyres International in Singapore.

Singapore, 1st October, 2006 – Nanoaq Pte Ltd collaborates with Stamford Tyres International in Singapore to promote IOGENIC™ Auto through all their 6 megamarts. This collaboration allows Nanoaq Pte Ltd to extend its reach to the market in all parts of Singapore. Extensive sales and technical training has been conducted for Stamford Tyres and now, Nanoaq is proud to announce that all the 6 megamarts of Stamford Tyres will be the authorized treatment centres for IOGENIC™ Auto.

Stamford Tyres was established in the 1930s, and has grown to be a major tyres and wheels distributor. With their focus on an integrated business concept with value added services that encompass distribution, retail and tyre management services, they are now the largest one-stop shop for all motoring needs in Singapore. With strategic locations all over Singapore, they bring ultimate convenience to all motorist.

Nanoaq, a Singapore-based supplier of nanotech *health protection systems*, has successfully introduced and launched a process designed for treatment of interior areas to *detoxify, sterilize* and *deodorize* the air, which effectively revitalizes the air resulting in cleaner and healthier air.

“We are always striving to improve our service to our customers. Working with Stamford Tyres allows us to reach out to all parts of Singapore. This would bring convenience to the market. This collaboration is definitely beneficial to all.” said Chan Peng, general manager of nanoaq.

-- more --

Nanoaq sees that in-car air pollution is a serious health threat to Singaporeans. Nanoaq's flagship product, IOGENIC™ Auto, is specially designed to combat in-car air pollution. IOGENIC™ Auto is a treatment that coats the whole car cabin with nano-titanium and nano-silver particles. This coating detoxifies, sterilizes and deodorizes in-car air, giving drivers and their passengers cleaner, fresher and healthier air when they are traveling in the midst of pollution on the roads.

Tests conducted by SETSCO Services, one of Singapore's largest independent test laboratories have proven IOGENIC™ Auto effective in killing bacteria and decomposing toxic exhaust gases, cigarette smoke, ammonia, nitrogen and sulphur oxides. New test by BSD (a spin-off company from NUS), proves that a new car that has been IOGENIZED has 20 times lower concentration of toxic gases as compared to another new car, after just 2 weeks.

The air quality in a new or old car is generally detrimental to our health. With IOGENIC™ Auto working in the background, the in-car air is always kept cleaner, fresher and healthier for the driver and his passengers thus protecting their health and making their journey a more pleasant one.
